

ABBI DINESH

Full-Stack Software Engineer

abhidinesh0215@gmail.com | +91 798 996 8262 | Hyderabad, India | linkedin.com/in/dinesh-abbi/

SUMMARY

Innovative developer specializing in end-to-end system architecture, delivering high-performance applications and intelligent workflows. Adept at managing the complete development lifecycle—from designing schema-driven backends to engineering wireless control interfaces for robotic hardware. Brings deep-dive analytical skills and cross-disciplinary adaptability to build seamless, robust user experiences across web, mobile, and IoT environments.

EXPERIENCE

Teleparadigm, Software Developer

07/2023 – Present | Hyderabad, Telangana

Full-Stack & AI Engineering

- Built and deployed secure full-stack web applications using React, Redux, and NestJS.
- Integrated AI features into core applications to improve functionality and user experience.
- Managed the complete development cycle, including Git versioning, server deployments, and state management.
- Wrote automated load and end-to-end tests using Playwright to ensure application stability under heavy traffic.
- Created clear technical documentation to easily explain complex system architectures to others.

Mobile App Development

- Developed and launched Android applications from scratch using React Native.
- Integrated secure APIs and handled complex state management for smooth, fast mobile experiences.

Robotics & Hardware Integration

- Wired and assembled DIY humanoid and bipedal robots from scratch.
- Built custom Android apps to act as wireless remote controls for the robotic hardware.
- Calibrated servos, troubleshooted hardware wiring, and wrote step-by-step instructional guides for robotics assembly.

EDUCATION

Bachelor of Technology in Computer Science and Engineering,

08/2019 – 07/2023 | Hyderabad, T.S

Keshav Memorial Institute of Technology, JNTUH

CGPA: 6.94

12th, MPC, Narayana Junior College

06/2017 – 03/2019 | Hyderabad, T.S

PER: 90.3%

TECHNICAL SKILLS

Languages — Proficient

- JavaScript
- TypeScript
- C / C++

Backend & Architecture — Competent

- NestJS
- RESTful API Development
- Schema-Driven Architecture
- Application Security Implementation
- Server Deployment & Hosting

Robotics, Hardware & IoT

- Microcontroller Integration (Arduino Nano, ESP32-CAM)
- Hardware-Software Integration (Wireless Control Interfaces)
- Servo Calibration & Motor Control
- Sensor & Bluetooth (BLE) Integration
- Rapid Prototyping (Bipedal/Humanoid platforms)

Core Competencies

- AI Feature Integration
- Technical Documentation & Curriculum Design
- End-to-End System Architecture
- Rapid Problem Solving & Ideation

Frontend & Web Technologies — Proficient

- React.js
- Redux (State Management)
- Vite
- Tailwind CSS
- Progressive Web Apps (PWA)
- Responsive UI/UX Design

Mobile Development — Competent

- React Native
- Android Application Development
- Mobile UI/UX Implementation

Testing, DevOps & Tools — Proficient

- Playwright (End-to-End & Load Testing)
- Git Version Control
- Environment Setup & Emulators

CERTIFICATES

Meta Front End Developer

Meta - Coursera

Data Science and Engineering

NPTEL

Social Networking

NPTEL

Data Structures and

Algorithms

Great Learning

Kahuna Skill Program

Ai Vision Driven Humanoid

PROJECTS

Tantrik, Playwright, GPU Clusters, JupyterHub

Engineered comprehensive load-testing suites and developed web interfaces for JupyterHub instances deployed across multi-node GPU clusters.

RoboParadigm & DrugParadigm, React, Vite, SuperTokens

Designed the secure frontend architecture and authentication flows for intelligent lab-automation systems and drug-discovery research platforms.

Tesseract, React, Redux, AI Integration

Built an intelligent client application featuring AI-driven generation of customized Q&A and multiple-choice assessments.

Project School & Beetal, React, Redux, NestJS

Architected and deployed an end-to-end educational platform and supporting backend services utilizing robust schema-driven REST APIs.

SOFT SKILLS

- Out-of-the-Box Thinking
- Unique Problem Solving
- Deep-Dive Analysis
- Cross-Disciplinary Adaptability
- End-to-End Ownership
- Self-Directed Execution
- Technical Communication
